## RESEARCH AREA

- 
- **Mobile Computing/Sensing:** smartphone authentication, 3D tracking (SLAM), and human activity sensing.
  - **Active Visual Recognition:** fine-grained visual recognition in augmented reality, video recognition.
  - **Location Based Services:** indoor map construction, indoor localization/navigation, and context aware services.

## PROJECTS

- 
- **Active Visual Recognition in Augmented Reality:** Build a mobile device based visual recognition system for hardware repair guidance in augmented reality.
  - **Smartphone Authentication:** Authenticate user of smartphone using camera and sound signals.
  - **Mobile Device Pose Tracking:** Track the 3D movement of mobile device in an infrastructure-free manner.
  - **Indoor Mapping (Acoustics):** Build indoor floor plans using acoustic sensing on smartphones.
  - **Indoor Mapping (Vision):** Build indoor floor plans using smartphones by taking images and inertial tracking.

## WORK EXPERIENCE

- 
- |   |                               |
|---|-------------------------------|
| • <b>IBM Thomas J. Watson Research Center</b>   | Yorktown Heights, NY          |
| • <i>Research Intern</i>  | <i>May 2018 - August 2018</i> |
| ◦ <b>Active Visual Recognition in Augmented Reality:</b> we propose an approach that combines both visual and camera pose data to recognize the changing state of 3D objects. We develop a prototype system with an iOS-based mobile app, demonstrate the practicality of our approach in AR-assisted hardware maintenance. |                               |
